Current Mining Tenements

Citation

Unique ID	ANZWA1220000382
Title	Current Mining Tenements
Jurisdiction	Western Australia

Description

Abstract	Current (Live and Pending) Mining Tenements comprising surveyed and unsurveyed tenements
Search Words	BOUNDARIES INDUSTRY Mining MINERALS BOUNDARIES-Administrative INDUSTRY-Mining MINERALS
Geographic Extent Polygon	-36.00 95.00, -36.00 129.00, -10.00 129.00, -10.00 95.00 10.00 S 95.00 E 129.00 E 36.00 S
Reference System	GDA2020

Dataset Currency

Creation Date	1994-08-09
Publication Date	

Dataset Status

Status	onGoing
Maintenance and Update	daily

Access

Available Format Type(s)	ESRI Shape, ESRI Geodatabase, Google Earth KMZ, MapInfo TAB, MS Excel XLS, CSV
Available Format Version(s)	ArcGIS 10.5
Access Constraints	copyright
Linkage	https://dasc.dmp.wa.gov.au/dasc/
Application Profile	Data and Software Centre
Function	download

Data Quality

Lineage	This data has been compiled from information submitted from DMIRS authorised surveyors (surveyed leases) and information supplied by applicants (unsurveyed)
Positional Accuracy	+/- 1 metre for surveyed tenements +/- 5 to10 metres for non graticular unsurveyed tenements Positional Accuracy 100% for Graticular tenement defined by GDA 94 or previous AGD84 Graticules (Geographicals Latitude and Longitude)
	95%

Attribute Accuracy	
Logical Consistency	Surveyed data is precision captured via EDM (pre1995) or RTK GPS techniques(post1995). Non Graticular Unsurveyed tenements are captured from applicants descriptions (bearing and distance or handheld gps) and are therefore subject to ground proofing or survey Graticular Unsurveyed Tenements are defined by GDA94 Graticule or previous AGD84 Graticule (Geographicals - Latitude and Longitude)
Completeness	The data is constantly updated in real time within the TENGRAPH system. This dataset is updated daily and is current at the time of export from the TENGRAPH system.
