

Government of **Western Australia**
Department of **Mines, Industry Regulation and Safety**

Application for authorisation of an explosive

Dangerous Goods Safety Act 2004

Dangerous Goods Safety (Explosives) Regulations 2007

ABN: 69 410 335 356

Applying for authorisation

Authorisation is provided for in the *Dangerous Goods Safety Act 2004* and prescribed in detail in the Dangerous Goods Safety (Explosives) Regulations 2007.

The procedure provides regulators and industry with an assurance and high level of confidence that explosives products used in Western Australia are manufactured, tested, packaged and labelled in accordance with recognised world wide standards, tests and criteria and will be fit for purpose on a continuing basis.

Authorised explosives used in Western Australia can be:

- imported from overseas; or
- manufactured in another State or Territory of Australia then imported into WA; or
- manufactured in this State.

Who can apply for authorisation?

Any person may apply to have explosives products authorised; however in the majority of cases applicants are explosives companies involved in the import and/or manufacture and supply of explosives. Applicants need to be able to demonstrate a legitimate need for the explosive and that it can be safely handled, stored and transported by suitably licensed people.

Need for authorisation

Any explosives used in this State must be authorised unless:

- it is being trialled and for which a Test Permit must have been issued for the explosives; or
- it is a power device cartridge that is a standard component of, and is fitted to, a commercially manufactured article; or
- it is an unrestricted firework; or

- it is a model rocket motor in which the NEQ is not more than 5 g; or
- it is covered under generic authorisation previously granted by the Chief Officer.

See the application for a Test Permit for further information on trialling explosives.

Where an explosive has already been authorised under an interstate law, that explosive will be automatically authorised in Western Australia and the authorisation fee is reduced.

Note: NEQ refers to Net Explosives Quantity

Certain explosives do not require authorisation

The Chief Officer has authorised certain explosives generically and therefore no industry authorisation is necessary for the following:

- all fireworks
- model rocket motors of UN 0186
- explosives specifically designed and marketed for use in petroleum and geothermal operations for the purpose of well perforation or seismic exploration
- marine distress flares and signals comprising of 16 specified UN numbers and complying with the requirements of AS 2092 *Marine distress flares and signals for pleasure craft*
- power device cartridges belonging to UN 0323 1.4S and UN 0276 (1.4C)
- small arms ammunition including blank ammunition with classification codes 1.4S and 1.4C.
- Current Limited Protectors (UN 0257, 1.4B, Fuzes, Detonating; and UN 0367, 1.4S, Fuzes, Detonating).

- Schedule of fees and charges
- Application for an Explosives Import/Export Licence
- Notice to import explosives or security sensitive ammonium nitrate (SSAN)

(available from the Department's website at www.dmirs.wa.gov.au)

Product information

To enable the authorisation process to be carried out with a high degree of confidence applicants must provide the Chief Officer with information about the nature of the product. The Dangerous Goods Safety (Explosives) Regulations 2007 specify the information which must be provided [r. 30(2)].

Applications must provide information on the following:

- product information design and formulation
 - explosives constituents
 - NEQ
 - how the explosive works
 - how it is initiated
 - effects and purpose
 - provision of a relevant safety data sheet (SDS)
- manufacture of the explosive
 - details of the manufacturer
 - place of manufacture
 - for how long the manufacturer has manufactured the explosive; and use by date (if any)
 - packaged explosives, the package's design and composition
 - markings on the package
- details of NEQ in each package; results of any tests conducted on the packaging; and any approval number given to the packaging under the Australian Explosives Code, current edition
- the United Nations (UN) number of the explosive as listed in the United Nations Model Regulations and the Australian Explosives Code, current edition
- the history of the explosive's use (including adverse experiences) in Australia and elsewhere. If the explosive is suitable to be used underground then information must be supplied about why it is suitable and about any tests carried out on it to determine suitability
- written directions by the explosive's supplier for its safe use and disposal.

Applicant details

Applications can be submitted by an individual, a body corporate or a partnership.

An application for an individual must include a copy of the applicant's current motor driver's licence for proof of identity.

An application from a body corporate must be in the name as described on the certificate of incorporation, and the original certified copy of the certificate is to be provided with the application.

The following are also recognised as corporate bodies:

- Federal or State Government Departments
- Local Government authorities (cities, towns, shires)
- Some semi-government organisations (e.g. Water Corporation, Western Power)

An application from a partnership must include:

- the original certified copy of evidence of the partnership; and
- a statutory declaration from each partner stating:
 - the name of the partnership
 - the name, home address and contact details of all partners; and
 - business in which the partnership is engaged.

The authorisation will be granted in the name of the partnership.

Please ensure that a contact number is provided in case the Departmental assessor needs to clarify matters or seek additional information. A residential business is mandatory and may be supplemented with a post office address.

Application lodgement

Complete the application section, including the checklist and attach all the required information. **Incomplete applications cannot be processed and will be returned.**

The completed application form, together with relevant documents and the relevant fee payable to the Department of Mines, Industry Regulation and Safety is to be mailed to:

Department of Mines, Industry Regulation and Safety
 Dangerous Goods Licensing
 Locked Bag 100
 East Perth WA 6892

or handed in person at:

Level 1, 303 Sevenoaks Street
 Cannington WA 6107

Business hours: 8.30 am to 4.30 pm

Contact details

Tel: (08) 6251 2300
 Email: cso@dmirs.wa.gov.au
 Website: www.dmirs.wa.gov.au or fees, forms, FAQs, guidance material and publications.

Notes:

- *Please refer to the schedule of fees and charges on the Department's website for the current fee applicable to this application for licence.*

Explanatory notes

The following notes outline the information required prior to authorising an explosive. For further information or clarification please contact the Department.

General details and classification	
Authorised name of explosive	Name given to the explosive by its manufacturer for authorisation and legal reference
Proper shipping name	e.g. "EXPLOSIVE, BLASTING, TYPE A". See Australian Explosives Code for more details
Classification code	UN Classification Code – Hazard division and compatibility group e.g. 1.1D
UN number	International identification number (United Nations Number)
Information supporting classification	e.g. Documentation from a recognised Competent Authority which classifies explosives and where required, results of classification tests conducted in accordance with UN criteria
Type of explosive	e.g. detonating cord, detonator, blasting explosive, flare, safety fuse
Primary use	Describe the application for this explosives, where is it to be used and for what purpose
Means of initiation	e.g. booster, detonator, electric, flame, impact
Manufacturer	Company name and manufacturing plant
Technical information	Technical bulletins and any other relevant information
Explosives formulation and characteristics	
Composition	List all ingredients using the correct chemical names. Detail the percentage (W/W) of each ingredient in the explosive. A separate sheet may be used
Explosive loading	e.g. detonating cord – PETN @ 10 g/m; detonators – base charge PETN 0.45 g, primary charge ASA 250 mg
Characteristics	
High explosives	Sensitivity, density, VOD (velocity of detonation) (confined/unconfined), energy
Detonating cords	Velocity of detonation, strength
Safety fuses	e.g. burning rate, burning rate tolerance, lateral ignition, water resistance
Detonators	Delay number, delay period (ms), strength
Propellants	Thickness, colour, grain shape, perforation, density, burning rate, stability test results
Boosters	Sensitivity, VOD
Fireworks	Effects, duration, burst spread, lifting and bursting charges, height
Other explosives	Effects, form (powder, pellets, etc.) and properties
Construction of explosive articles	
Construction	Description and dimensions of item, plus diagram where appropriate e.g. detonators, size, details, delay period, leadwire details – length, colour and nature of coating, wire gauge. Detonating cord – 4 mm diameter, 250 m per reel; Boosters – 27 x 33 mm @ 31 g ea. etc.
Outer covering	e.g. Detonating cord – polythene, blue. Boosters – white paper tubes
Labelling	Description of label and markings (include photograph of the item)
Packaging	
Packaging description	Method of packing (including inner and outer cartons and any lining), net weight of package, details of contents e.g. any internal packaging, number of items per case, number of internal cases per carton, UN package testing details
Labelling	
Labels on inner and outer packaging	Details of labels on inner and outer packaging (include a photograph of the item). See requirements in Australian Explosives Code
Safety	
Hazards	Any relevant information on hazardous properties, including shelf life, nature of deterioration and effect of aging
Safety data sheet (SDS)	For details on safety data sheets refer to the guidelines issued by SafeWork Australia
Emergency procedure guides (EPG)	For details on EPG, refer to the Australian Explosives Code
Administration	The correct fee must accompany this application

Government of Western Australia
Department of Mines, Industry Regulation and Safety

Application no. (office use only)

Application for authorisation of an explosive

Dangerous Goods Safety Act 2004

Dangerous Goods Safety (Explosives) Regulations 2007

ABN: 69 410 335 356

Note:

A separate application form must be completed for each explosive to be authorised. Information given in and supplied with this application will be treated confidentially.

1. Application type (you must tick one of the boxes)

New application

[Complete all sections]

Amendment(s) to an existing authorised explosives

[Complete all sections, a fee is not payable]

Reference number

(located on approval letter under "Our Ref")

Briefly describe amendment(s)

2. Applicant details

Details of person making application

Position held

Family name

Given names

Body corporate (name as shown on certificate of incorporation – an original certified copy of the certificate must be attached)

ABN

OR

ACN

Contact details (all applicants)

Phone

Facsimile

Mobile

Email

Business street address (mandatory)

Unit no.

Street no.

Lot no.

Street

Type

Town / suburb

State

Postcode

Postal address (complete if different from above)

Unit no.

Street no.

Lot no.

Street

Type

PO box no.

Town / suburb

State

Postcode

3. Authorisation under an interstate law

Has authorisation of this explosive been refused elsewhere?

Yes No

If 'Yes', indicate the relevant State or Territory

Has authorisation of this explosive been authorised elsewhere?

Yes No

If 'Yes', please provide the following information.

Authorisation number

State/Territory

Date granted

Please provide documentation to support the claim.

4. General details

Proposed authorised name of explosive

Primary use (type of blasting or pyrotechnics application)

How will the explosive be initiated?

Type of explosive

Substance Article If an article provide Net Explosive Quantity (NEQ)

Is the explosive suitable to be used underground? Yes No

If 'yes', please include information about why it is suitable and any tests carried out to decide its suitability.

Manufacturer contact details (mandatory)

Name of manufacturer

Unit no.

Street no.

Lot no.

Street

Type

(e.g. St, Rd)

Town / suburb

State

Postcode

Country of manufacture

Number of years that this explosive has been manufactured by the manufacturer named above

5. Classification information and testing details

UN number(s) proposed for this explosive

(If authorisation relates to UN 0241 and is for a bulk explosive, and the Test Series 8 results of the "UN Manual of Tests and Criteria" for the Precursor have NOT been previously submitted, please supply them electronically)

UN classification code(s) proposed for this explosive

Proper shipping name

Has testing been carried out to confirm proposed classification code(s) in accordance with the latest edition of the "UN Manual of Tests and Criteria"? Yes No

If 'Yes', attach test results.

If 'No', on what basis has classification code(s) been established?

Other relevant information (please specify)

6. Explosives formulation and characteristics

Fully describe each of the explosive's constituents (ingredients) and the amount of each constituent by weight. A separate sheet may be used.

Constituent (correct chemical names)	% Content (by weight)

Characteristics of the explosive

Provide details of the effect of the explosive when initiated

Note: Refer to the explanatory notes for further clarification

Attach a safety data sheet and technical data sheet for the explosive.

Is a SDS attached? Yes No

Is a technical data sheet attached? Yes No

If application is for a bulk explosive, go to section 9.

7. Construction of explosive articles

Attach a diagram showing the construction of the explosive (e.g. a cutaway drawing showing each component).

8. Packaging details

UN packaging approval number	Packaging instruction no.

The method of marking of packaging

The number and NEQ of explosives in each form of packaging in which the explosives are handled

Information that the packaging complies with the packaging requirements of the AEC

Description of packaging

Inner

Intermediate

Outer

Labelling (refer to the latest edition of the Australian Explosives Code, section 3)

Outer package

Item	Tick if shown	Size of print (mm)	Item	Tick if shown	Details
Proper shipping name			Lot and batch number		
Authorised name			Name and address of Australian contact		
UN number			Date of manufacture		
Class label			NEQ of substance		
Subsidiary label			No. of articles or units within package		
Word 'EXPLOSIVE'			Other markings		

Labelling (cont'd)**Inner package**

Item	Tick if shown	Comment
Authorised name		
Class label		
Subsidiary label		
Name and address of Australian contact		
Other markings		

Articles

If the article is a cartridge of explosives or a booster, does it display the word "EXPLOSIVE"? Yes No

If the article is a detonator, does it display the words "DANGER, EXPLOSIVE, DETONATOR" or equivalent, as per the AEC requirements? Yes No

If 'No' please provide details

9. Safety information

Safety shelf life

Potential hazards

Nature of deterioration

Special precautions in handling and use

Method of disposal

Is there any additional safety information or accident history which should be advised in properly assessing this explosive? Yes No

If 'yes', please attach details.

10. Applicant's declaration (where the intended licence holder is not an individual, this declaration must be signed by a person within the business / firm who has authority to sign)

I declare the information provided in this application and the documents provided in support of it, are true and correct. I understand that providing false or misleading information in an application is an offence.

Name Position
 Signature of applicant Date / /

11. Checklist (please tick the boxes to ensure your submission is complete)

- Completed and signed application forms
- If a body corporate, an original certified copy of certificate of incorporation
- If a partnership, the following:
 - the original certified copy of evidence of the partnership
 - a statutory declaration from **each** partner stating (the name of the partnership; the name, home address and contact details of all partners; the business in which the partnership is engaged)
- If a trust, the following:
 - the original certified copy of a document which states the name of the trust
 - full name, home address and contact details of at least one of the trustees
 - if the nominated trustee is a body corporate or partnership, the documents required are the same as advised for such entities
- If an individual, a copy of the applicant's current motor driver's licence
- A copy of interstate authorisation (if applicable)
- A copy of proof of classification documentation
- A copy of all relevant technical information as it relates to the explosive, including tests performed, all test results (good and adverse)
- A copy of all relevant product information
- A copy of the SDS for the explosive
- A copy of the Technical Data Sheet
- Relevant photographs of the explosive, including packaging (if applicable)
- Artwork for the packaging
- Payment of the licence fee

Incomplete applications cannot be processed and will be returned.

The approval process may take several months and the Chief Officer may seek further information or request that further testing be performed.

12. Payment

Payment must be made by Visa or Mastercard credit cards. You will be contacted by telephone for payment on the telephone number provided in your application.

If a person other than yourself is to pay for this application, please provide relevant contact details below. **Incomplete information may delay the processing of your application.**

Payment contact details

Payer name *(must be completed even if a company is paying)*

Payer company *(if a third party company is paying)*

Payer daytime phone number

Payer mobile number

Payer email address

13. Enquiry contact details
