

# Looking after dangerous goods in your community

## What can you do if there is a chemical fire, spill or leak?

### If it is safe and easy

- Put out small fires (e.g. fire extinguisher)
- Try and stop small spills and leaks (e.g. spill kit)
- Tell your community CEO

### If it is not safe or easy

- Tell the fire brigade or your community CEO or coordinator
- Stay away from the fire or spill

### Stay safe by keeping out of

- Smoke coming from burning chemicals
- Wind blowing over spilled or leaking chemicals

### Cleaning up spills

Use a spill kit. If there isn't one handy you can use:

- clean sand or dirt to absorb the spill
- a broom or shovel to collect the contaminated sand or dirt
- clean, empty containers (with a lid) to put the sand or dirt into.
