

# Notice to export explosives or security risk substances (SRS) from Western Australia

**Dangerous Goods Safety (Explosives) Regulations 2007**  
**Dangerous Goods Safety (Security Risk Substances) Regulations 2007**  
**Dangerous Goods Safety (Goods in Ports) Regulations 2007**

## Requirements for this notice

- This notice is to be used for exports of explosives or SRS.
- Separate notices are to be lodged if explosives and SRS are included in the same shipment.
- The person exporting the explosives or SRS must hold a current explosives or SRS import/export licence.
- This notice must be lodged by the licence holder with Resources Safety at least 7 days prior to the date of expected departure.
- The licence holder must provide with this notice a Material Safety Data Sheet for all of the explosives or SRS detailed in the notice.
- A certificate of analysis (signed by the licence holder) must be provided (SRS only).

## Relevant international requirements

For the purposes of these regulations 'relevant international requirements' means:

- for explosives transported by water - the latest edition of the International Maritime Dangerous Goods Code published by the International Maritime Organisation; and
- for explosives transported by air - the latest edition of the Dangerous Goods Regulations published by the International Air Transport Association

## Certificates of analysis

These are required only for ammonium nitrate exports. A certificate should include, as a minimum, the following information:

- Product name
- Shipment and date that sample taken
- Chemical analysis that incorporates bulk density test, carbon content and AN content.
- Analyst name, laboratory name, location and certification level
- Place and date of analysis
- Signature of the licence holder

## Retention action for notices

- Licence holders must retain records of all exported explosives for 2 years after the date of the export.
- Licence holders must retain copies of all SRS export notices for 5 years after the date of export.
