

## GENERAL EXEMPTION FROM PROVISIONS OF REGULATION 6.34 OF THE MINES SAFETY AND INSPECTION REGULATIONS 1995 IN RESPECT OF THE REGISTRATION OF CERTAIN CLASSIFIED PLANT

As I am satisfied that where specific items of Classified Plant have been design reviewed and registered by another Commonwealth, State or Territory with responsibility for plant safety, full compliance with the provisions of regulation 6.34 of the *Mines Safety and Inspection Regulations 1995* is unnecessary, pursuant to regulation 1.5 of the *Mines Safety and Inspection Regulations 1995* I hereby grant a general exemption from the requirement to register such classified plant.

This general exemption applies only to classified plant that:

- Is of a type specified in regulation 6.34(5) of the *Mines Safety and Inspection Regulations 1995*; and
- Is currently registered by a Commonwealth, State or Territory authority with responsibility for plant safety.

This exemption is subject to the following conditions:

1. In the case of 'Classified Plant' that is permanently located at the mine site or is owned by the principal employer at the mine site then documentary evidence that the classified plant in question is currently registered by a Commonwealth, State or Territory authority with responsibility for plant safety must be provided and attached to the Classified Plant Record Book at the mine for perusal by an inspector at any time; and
2. In the case of an item of itinerant 'Classified Plant' owned by another party other than the principal employer a "Classified Plant" record book remains with the respective plant item when the plant is at the mine, and made available at any other time when requested by an inspector; and
3. A system of work is implemented which prohibits the entry of any itinerant 'Classified Plant' items unless accompanied by a 'Classified Plant' logbook containing all requisite regulatory information that allows it to be used on a mine; and
4. While the plant is present and in use at the mine the requirements specified in regulation 6.40 of the *Mines Safety and Inspection Regulations 1995* are complied with.

This exemption issued under regulation 1.5 of the *Mines Safety and Inspection Regulations 1995* supersedes the general exemptions issued by the State mining engineer on 30 March 1999, 31 March 2006 and 6 April 2010 related to regulation 6.34 of the *Mines Safety and Inspection Regulations 1995* which are hereby revoked.

A handwritten signature in blue ink, appearing to read 'SL Ridge'.

Simon L Ridge  
State mining engineer
