### DG News

The Department of Mines and Petroleum (DMP) Director General Richard Sellers distributes quarterly email updates on the department's latest activities.

This is a valuable tool for anyone interested in the future of the Western Australian mining and petroleum industry.

It provides an update on topics such as the department’s work in progress, upcoming events and staff movements relevant to industry.

The email is distributed in addition to DMP’s existing range of publications, including Prospect.

**What are RSS feeds?**

[RSS \(Rich Site Summary or Really Simple Syndication\)](#) is a web format for delivering and receiving changing web content. It allows users to stay informed by easily having access to content from a chosen site. Meaning you don't have to go to each individual site or subscribe to email newsletters.

RSS makes staying up to date easy as you constantly have the latest information at your finger tips. The feed is read by an RSS News Reader and then displayed in a manner that is quick and easy for you to read.

A feed contains a summary of content from a particular site and usually gives you the option of view the entire article if you require.
