Data and Software Centre

The Data and Software Centre enables the download of statewide spatial datasets and various spatial application software, including GeoMap.WA and the Mineral Exploration Reporting Templates Software. Each dataset zip file contains the following:

- Metadata statement (HTML File).
- The Dataset [unprojected, geographical coordinates based on the 1994 Geocentric Datum of Australia (GDA94)].
- Licence statement (text file).

Access to [Data and Software Centre](#).
