

General Overview

Transcript

This video provides a general overview of the TENGRAPH (Web) system.

TENGRAPH (Web) opens a map of WA.

The “I want to...” menu contains the most commonly used TENGRAPH tools. More information can be found in the “I want to...” video on DMP’s website.

Click “Jump to a map bookmark...” and select the “Murchison” from the drop down menu.

Right click the map to open the context menu.

Select “What’s here” to query active TENGRAPH (Web) layers at the selected point.

The results are listed in the information panel.

Place the mouse pointer over each result to highlight the area on the map.

Left click a tenement in the information panel to find out more information.

To open a Western Australia overview map, click the arrow at the bottom right corner of TENGRAPH (Web).

Change between the Map Layer and Results panel by switching tabs at the bottom left of the screen. More information can be found in the Map Layers instructional video

Close the results tab.

Use tools in the Getting Around toolbar to navigate around the map

Use the Identify Tools tab to query active map layers.

Use the Drawing & Measurement toolbar to create, edit and analyse constructed polygons. When drawing a polygon, double click on the final point to finish your polygon. For more information see the “Create Polygon” tutorial on DMP’s website

The Maps & Data Sources tab has a link to DMP’s Data Centre or can be used add your own data to the map display.

Use the Search Tools tab to access a comprehensive list of search tools. The Advanced Tenement and Advanced Land drop down menus contain more search options.

Use the Printing and Reports tab to run quick appraisals or print maps. Use the “Constructed Object” tool under ‘Quick Appraisal’ to run a quick appraisal on a constructed object. Using the point icon, select the polygon you wish to run the quick appraisal against.

Use the Help & Feedback tab for useful help tools including the Quick Reference Guide and FAQ documents.

For any further queries or for further information, use the “Submit Feedback” button and complete the form.

If you require further assistance, please contact the Tenement Information Centre 08 9222 3626, or the IT Service Desk 08 9222 0777 during office hours.
