

Accredited consultant's certificate – security sensitive ammonium nitrate licence applications

This certificate has been completed to fulfil the requirements of regulation 30(5) of the Dangerous Goods Safety (Security Sensitive Ammonium Nitrate) Regulations 2007.

Application for a licence for:

Applicant name

Licensed site location / address

Security sensitive ammonium nitrate licence type

In accordance with regulation 30(5) I certify that for the above licence application:

- I have read the application
- I am satisfied that the application complies with regulation 30
- if the application is accompanied by a document for the purposes of subregulation 30(5), I am satisfied the document complies with that subregulation
- I have read the security plan
- I am satisfied that the security plan complies with regulation 31
- unless the application is for an security sensitive ammonium nitrate fertiliser licence, I have done an assessment of the risks referred to in regulation 31(2)(a) and I am satisfied the applicant has taken or will take all reasonably practicable measures to minimise those risks in relation to the security sensitive ammonium nitrate to which the licence would relate
- If the licence relates to a site, I am satisfied that the site can be operated in accordance with these regulations.
